Question Practise + Active Revision

'RESTLESS EARTH LEARNING OBJECTIVES	Revision Materials Complete
I can name several large plates forming the Earth's crust.	
I explain the differences between destructive, constructive and conservative plate margins.	
I can name two landforms at destructive margins and explain their formation.	
I can describe the main features of the world distribution of fold mountains, active volcanoes and earthquakes. <b>Fold mountains</b> - I can....(1) name one mountain range, (2) explain its formation, (3) describe some of the physical problems for people, (4) Describe four human activities found there.	
I can describe the two types of volcanoes and explain where they are found.	
I can give the effects of volcanoes on people using these headings - primary, secondary, positive, negative. <b>Volcanic eruption</b> case study....(1) name an example, (2) explain how it was caused, (3) state its effects (good and bad) on people, (4) describe what people have done (their responses).	
I can describe two differences between super-volcanoes and other volcanoes.	
I know the main features of an earthquake and two different ways of measuring earthquakes. <b>Earthquakes in both rich and poor countries</b> - I can ....(1) explain why the earthquake happened there, (2) write about the damage and destruction (effects) that resulted, (3) describe what was done after the quake (responses).	
I can explain why earthquakes cause more loss of life in poor than in rich countries.	
<b>Tsunami</b> - I can explain the cause of the Asian tsunami, I can name some of the places affected and the damage it did (the effects), and describe how people responded to the disaster.
